

TRAINING INTUITUTE *WWW.NPDESTRAINING.COM 678-469-5120 A GOOD SWPPP. THE FOUNDATION OF VERICA'S SURFACE WATER QUALITY!

The question to ask ourselves today with over 340 million people in the United States of America is: "If everyone were to do what I'm about to do, how would it affect the water quality in my local stream, river or lake?"

What if everyone else was doing it?

industrial facilities.

Certified Inspector

An examination is conducted immediately following classroom instruction. Course attendees are required to achieve a minimum examination score of 70% for their 3-year MS4CECI Certificate. The MS4CECI course was designed by federal, state and local regulatory personnel as well as stormwater consultants with over 100 years of combined experience in educating MS4

field inspectors, stormwater managers and consultants, with a focus on MS4 stormwater

stormwater personnel to manage and perform stormwater inspections of municipal,

commercial, industrial and construction activities. The 2-day seminar teaches federal and

state stormwater laws as well as local ordinances, and provides instruction on how to

perform outfall investigations, prioritize sub watersheds for inspections and properly comply

with and enforce the various NPDES permits assigned for MS4s, construction sites and

• Identify and select appropriate plants for BMPs • Understand maintenance requirements of BMPs • Identify common problems and solutions for BMPs • Understand how to implement a landscape maintenance plan • Evaluate plant performance and how to replace failing plants

How can a city government hold a general contractor or industrial

reason people are leaving Los Angeles. The city (with obvious tolerance from the State) is

willingly violating its MS4 Permit by pressure washing human excrement, syringes and other

pollutants directly down their storm drains. Los Angeles, Portland, Seattle and others are

Comply with Their Own NPDES Permits!

just another reminder of how important it is that we Americans demand their compliance with Clean Water Act NPDES rules & regulations! Every time you go fishing or jump in the lake to take a swim, be grateful for the our NPDES permitting program that makes it all possible IF polluters are made to comply. Respecting our neighbors downstream is what America is all about and it's compliance with NPDES Permits that helps us do that! "We all need to view NPDES Permit compliance as an investment in our nation's future quality of life, so our children will also have an equally great place to live, swim, fish, boat and hunt tomorrow!
