Mr. Luke Owens

NPDES Stormwater Training Institute
1000 Peachtree Industrial Blvd
Suite 6 PMB 287
Suwanee, GA

Dear Mr. Owens,

In my role as Liaison Project Manager for Amec Foster Wheeler, one of my responsibilities is to ensure that all construction inspectors obtain and maintain all required certifications to inspect the contractor's installation and maintenance of erosion control devices on Georgia Department of Transportation projects.

I have found that the NPDES Training Institute's web site is easy to use and with classes scheduled in all parts of the state throughout the year. Although the registration process is easy, Ms. Rita Pantels is always ready to help if needed. Ms. Pantels was able to accommodate our needs by scheduling a class specifically for our Amec Foster Wheeler employees as we had a large group (20) of employees in the Augusta area that need re-certification this year.

The instructors are well versed in the subject matter are able to teach the information in a way that is easy for attendees to understand. Our new Amec Foster Wheeler employees have had a 100% pass rate for the GSWCC Level 1A certification class. More experienced employees that have attended the re-certification class have stated "best erosion control class they have ever attended"; "material presented provided useful information" and "was impressed with the instructor (Luke Owens) and the way the material was presented."

I would definitely recommend NPDES Training Institute to anyone that needs GSWCC certifications.

Sincerely,

Garry Reed
Senior 2 Construction Manager
